

Formation of a Committee to Schedule Resumption of Over the Board Chess

The pandemic solution is fluid with infection rates and distancing requirements changing as it evolves. We will not be able to resume until the clubs can implement measures to make playing safe in an affordable way both from a cost viewpoint and effort required to implement the measures. Since the difficulty of implementing requirements will be venue dependent it will be essential all clubs are represented in the assessment of when to restart over the board chess.

It is therefore proposed that the BACL form a committee including the Executive and representatives of each club. The committee will convene from time to time when there is sufficient change for there to be the prospect of play. It is likely that business will be conducted by email debate and online meetings. At the AGM, we would wish the clubs to nominate their representatives on this committee; one representative per club plus the Executive.
